POLITICAL WORLDS

3-7 JULY 2023

A welcome from the committee

Welcome to the Political Studies Association Early Career Network's (PSA ECN) annual conference for 2023, focused on the theme of Political Worlds. This year's conference will be held online and we are thrilled to welcome presenters from countries all over the world who will be sharing their cutting-edge research with us. The early career and PhD community are at the forefront of political research, and we are delighted to provide a platform to celebrate and discuss this work.

Alongside our wonderful conference presentations, keynotes, and roundtables, we are excited to offer a Career Development day Friday 7th July. This day is packed with sessions which speak to some of the challenges and opportunities we face as early career researchers today. They include panels on publishing your research, navigating the job market, seeking professional opportunities outside of the university, and insights about teaching.

We extend our deepest gratitude to everyone at the PSA who helped make this conference possible, including our outstanding chairs, brilliant guest speakers, and wonderful PhD and early career presenters and attendees.

We hope that you have an enriching and enjoyable conference!

W.J.M. MacKenzie Book Prize Keynote: Democratic Design

14:00 - 15:00 (UK time)

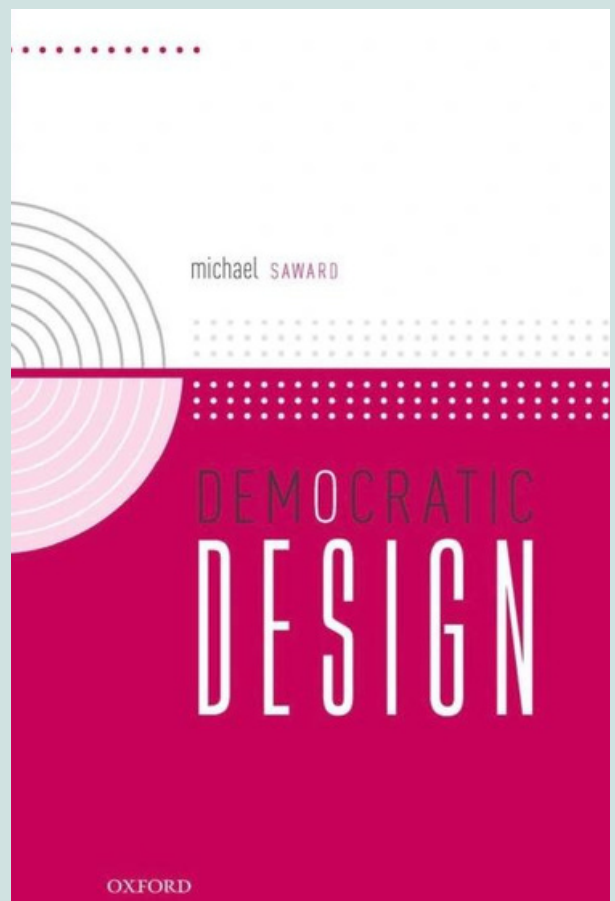

Speaker: Professor Michael Saward (University of Warwick)

Chaired by Taylor Borowitz (SOAS, University of London)

Democracy faces stern tests around the world in the twenty-first century. Democratic Design argues that to respond effectively and creatively, democrats need to work with a versatile new toolkit of concepts and institutions. The book assembles this toolkit — the democratic design framework — through an original blend of design thinking and democratic theory and practice. It shows how to use the framework to renew and enliven our ideas of democracy across a range of contexts.

The book explores a wide range of institutions, from the familiar (such as parliamentary procedures) to the innovative (such as citizens' assemblies). It underlines the importance of systemic and contextual design, and the practical enactment of democratic values such as equality, freedom and participation.

For the second year in a row, we are excited to be joined by the author of a W.J.M MacKenzie Book Prize winning title for a keynote address. Join us to hear Professor Michael Saward talk about the insights offered by Democratic Design.

14:00 - 15:00 (UK time).

Speaker: Katie Pruszyński (University of Sheffield)

As researchers, we hope that the work we do ends up making change for the better. Working with partners outside of academia can help to ensure that our research answers the most pressing questions, and reaches those in most need.

But how do we know who to work with? How do we build trusted working relationships? And how do we ensure we conduct our partnerships ethically?

This workshop will offer tips on how to find potential partners, and discuss the challenges of building fair and equitable collaborations.
